

JARED RUMMLER

Entrepreneurial Software Engineer

PROFILE

Senior software engineer with a 15+ year track record across mobile, backend, and AI. Deep Android leadership at NBCUniversal, Brightcove, and Fidelity, combined with current AI product development through GoatBytes.IO. Focused on architecture, cross-platform delivery, accessibility, and reliability at scale.

EXPERIENCE

9 roles

GoatBytes.IO

Aug 2018 - Present

ACTIVE

Founder, CEO, Software Engineer

Founder · Independent

Long-running founder venture spanning mobile consulting and AI-driven product development.

- Founded and operate independent software consulting and product company
- Lead engineering across client engagements in mobile, backend, AI, and voice systems
- Designed and implemented modern mobile application architectures (Android, iOS, Kotlin Multiplatform)
- Integrate third-party APIs, hardware devices, telephony systems, and LLM/AI providers

JRummy Apps Inc.

Oct 2010 - Feb 2018

Founder, CEO, Software Engineer

Founder · Independent

Founded and exited a profitable Android utility studio — 25+ apps, 50M+ downloads, two sustained top-10 paid apps, acquired by Maple Media in 2017.

- Founded, incorporated, and operated the company end-to-end as solo founder, CEO, and software engineer
- Designed and shipped 25+ Android utility, security, root, and customization apps to Google Play
- Owned the full product lifecycle for each app — research, UX, native engineering, QA, release, support, and lifecycle marketing
- Built native engine code against Android root, BusyBox, the Linux kernel, and TWRP / ClockworkMod recovery — including a custom BusyBox compile pipeline
